

Title: Storyboard – PlatePal Recipe & Meal Planner App

Your Name: Martel

ITDEV117

Screen 1: Home / Dashboard

Users see a personalized greeting, today's planned meals, and quick options to add breakfast, lunch, or dinner. The bottom navigation allows easy access to all app sections.

Screen 2: Discover Recipes

Users can search for recipes or browse trending and categorized recipes (Breakfast, Quick & Easy, Healthy, Vegetarian). They can scroll through attractive food photos and select any recipe to view details.

Screen 3: Recipe Detail

This screen shows a large photo of the dish, ingredients list with checkboxes, step-by-step cooking instructions, preparation time, and servings. Users can easily add the recipe to their daily or weekly plan.

Screen 4: Weekly Meal Planner

Users can view and organize meals for the entire week. Each day has slots for breakfast, lunch, and dinner. A "Generate Weekly Plan" button helps users automatically create a full week of meals.

Screen 5: Shopping List

After planning meals, users see a generated shopping list organized by ingredients. Items can be checked off, making grocery shopping simple and efficient.

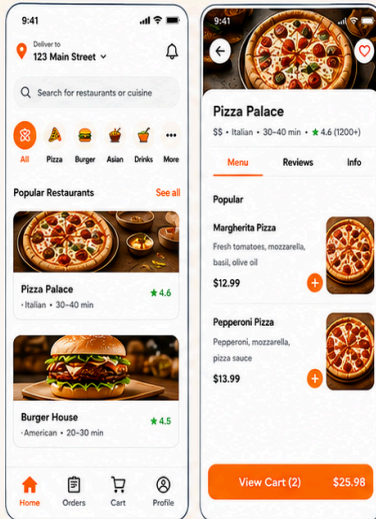

FOOD DELIVERY APP – STORYBOARD / SCREEN FLOW

Browse Restaurants → Select Items → Checkout & Pay → Track Order

1 BROWSE & SELECT

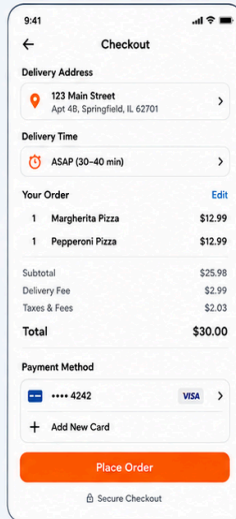

Discover restaurants and add items to cart

User browses restaurants, views menus and adds desired items to the cart.

2 CHECKOUT & PAY

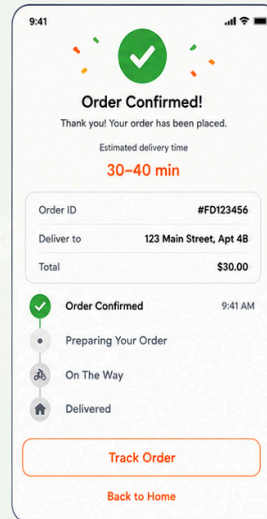

Review order, enter details and make payment

User reviews the order, adds address, chooses payment method and places the order.

3 ORDER CONFIRMED

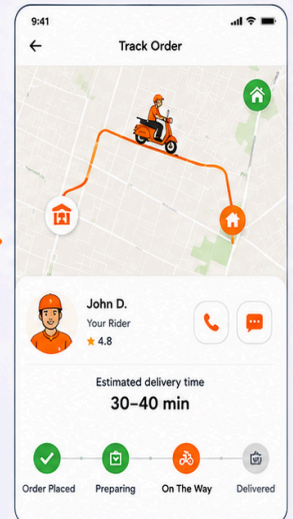

Order is confirmed and being prepared

Order is confirmed and the user can track progress in real time.

4 TRACK ORDER

Track order in real time until delivery

User tracks the rider on the map and gets real-time updates until delivery is completed.
